

SIMATS ENGINEERING (SAVEETHA SCHOOL OF ENGINEERING)
Department of Artificial Intelligence and Data Science ASSESSMENT
TOOL 2 – Technical Presentation

Course Code:	DSA0306	Course Title:	Natural Language Processing
CO Assessed:	CO1 – Imitation (L1)	Assessment:	Assessment Tool 2 – Technical Presentation
Weightage:	30% of CIA		
CO1 Statement:	Analyse NLP models, regular expression patterns, finite state automata, morphological processing techniques and to interpret language processing. (BL-3)		
Student Name:	Y Sravan Kumar	Reg. No.:	192472289
Section / Batch:	CSE AI	Date:	16-07-2026

Code of Conduct

I Y. Sravan Kumar (192472289) (Name / Reg No) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.

Signature of the Student: _____ Y. Sravan Kumar _____

Instructions

- Suggested Team Member Roles (3 Members)
 - Member 1: Theory, Concepts, and Literature Review
 - Member 2: Algorithm Design, Models, and Technical Analysis •
 - Member 3: Demonstration, Case Study, Applications, and Conclusion •
- GPS photo must submit.
- Duration: 30 minutes.

Section / Topic	Focus	Q Nos
Evolution of Natural Language Processing: From Rule-Based Systems to Modern NLP	NLP Models, Language Processing Evolution	TP-01
Comparative Study of NLP Models and Algorithms	Model Analysis, Algorithm Comparison	TP-02
Regular Expressions for Real-World Text Processing	Pattern Matching, Information Extraction	TP-03
Designing Efficient Regular Expression Patterns for Information Extraction	Text Mining, Data Extraction Techniques	TP-04

Finite State Automata in Natural Language Processing	State Transitions, Language Recognition	TP-05
Building a Finite State Automaton for Token Recognition	Lexical Analysis, Token Validation	TP-06
Morphology and Word Formation in Natural Languages	Morpheme Analysis, Word Structure Processing	TP-07
Inflectional Morphology: Understanding Grammatical Variations	Grammatical Analysis, Word Normalization	TP-08
Derivational Morphology and Vocabulary Expansion	Word Generation, Semantic Transformation	TP-09
Comparative Analysis of Inflectional and Derivational Morphology	Morphological Classification, Language Analysis	TP-10
Finite-State Morphological Parsing Techniques	Morphological Parsing, Finite-State Processing	TP-11
Morphological Analysis for Indian Languages	Language-Specific Morphology, NLP Challenges	TP-12
Porter Stemmer: Design, Working Mechanism, and Applications	Stemming Algorithms, Text Preprocessing	TP-13
Stemming vs Morphological Parsing: A Comparative Study	Word Reduction, Morphological Processing	TP-14
Integrated NLP Pipeline: From Regular Expressions to Morphological Processing	End-to-End Language Processing Pipeline	TP-15

Annexure A – Technical Presentation

Team No.	Technical Presentation Title	Description
1	Evolution of Natural Language Processing: From Rule-Based Systems to Modern NLP	Analyze the historical development of NLP models, key milestones, and how language processing has evolved from handcrafted rules to intelligent systems.
2	Comparative Study of NLP Models and Algorithms	Explore different NLP models and algorithms used for language processing, comparing their working principles, strengths, and limitations.
3	Regular Expressions for Real-World Text Processing	Demonstrate how regular expressions are used for data validation, text extraction, log analysis, and information retrieval in practical applications.
4	Designing Efficient Regular Expression Patterns for Information Extraction	Analyze complex regular expression patterns used to extract emails, phone numbers, URLs, dates, and structured information from unstructured text.
5	Finite State Automata in Natural Language Processing	Explain the concepts of deterministic and non-deterministic finite automata and their role in lexical analysis and language recognition.
6	Building a Finite State Automaton for Token Recognition	Design and demonstrate a finite state automaton that recognizes tokens such as identifiers, keywords, and numbers in textual data.
7	Morphology and Word Formation in Natural Languages	Investigate how words are structured and formed using morphemes, and analyze the importance of morphology in NLP systems.
8	Inflectional Morphology: Understanding Grammatical Variations	Examine how inflectional changes affect word forms based on tense, number, gender, and case across different languages.
9	Derivational Morphology and Vocabulary Expansion	Analyze derivational processes that create new words and study their impact on semantic interpretation and language understanding.
10	Comparative Analysis of Inflectional and Derivational Morphology	Compare the characteristics, applications, and challenges of inflectional and derivational morphology in NLP tasks.
11	Finite-State Morphological Parsing Techniques	Explore finite-state transducers and parsing techniques used to analyze and generate morphological structures in natural languages.
12	Morphological Analysis for Indian Languages	Study the challenges and solutions involved in performing morphological processing for morphologically rich Indian languages such as Tamil, Hindi, and Telugu.
13	Porter Stemmer: Design, Working Mechanism, and Applications	Analyze the Porter Stemming algorithm, its rule-based approach, implementation steps, and role in information retrieval systems.
14	Stemming vs Morphological Parsing: A Comparative Study	Compare stemming and morphological parsing techniques based on accuracy, computational complexity, and application scenarios.
15	Integrated NLP Pipeline: From Regular Expressions to Morphological Processing	Demonstrate a complete NLP preprocessing pipeline incorporating regular expressions, finite state automata, stemming, and morphological analysis for text processing.

Rubrics for Calculation

Technical Presentation					
Criteria	Weightage	Level 4 – Exemplary	Level 3 – Proficient	Level 2 – Developing	Level 1 – Beginning
Technical Content Accuracy	30	Highly accurate, indepth, and insightful technical explanation	Technically correct content with adequate depth and clarity	Basic concepts presented with limited accuracy and depth	Content contains major technical errors; concepts poorly understood
Problem Identification	25	Problem rigorously analyzed using appropriate and advanced methods	Problem clearly defined with a logical engineering approach	Problem identified but analysis or methodology is weak	Problem statement unclear or incorrect; no logical approach
Use of Tools	20	Advanced tools, well-analyzed data, and highly effective visuals	Appropriate tools and data used effectively with clear visuals	Limited use of tools and basic data interpretation	Minimal or incorrect use of tools and data; poor visuals
Communication	15	Highly engaging, confident, and audience-focused delivery	Clear, organized, and professional communication	Understandable but lacks clarity, structure, or confidence	Poor organization, unclear speech, ineffective slides
Professionalism	10	Exemplary professionalism, leadership, and ethical awareness	Professional conduct with effective team collaboration	Basic professionalism ; uneven team participation	Lacks professionalism ; minimal contribution or ethical awareness

Team No. / Criteria Level	Technical Content Accuracy	Problem Identification	Use of Tools	Communication	Professionalism	Total %

Morphology and Word Formation in Natural Languages

DSA0306-Natural Language Processing

Guided By :

Dr. Kumaragurubaran

Presented By :

Y . Sravan Kumar (192472289)

Introduction

What is Morphology?

- Morphology is the branch of linguistics that studies the **internal structure of words** and how new words are formed using the smallest meaningful units called **morphemes**.

Key Points

- Studies word formation.
- Analyzes word structure.
- Identifies morphemes.
- Helps understand language rules.
- Essential in Natural Language Processing (NLP).

Example

Unhappiness

➤ Un + Happy + Ness

1. **Un** → Prefix

2. **Happy** → Root Word

3. **Ness** → Suffix

Morphemes

What is a Morpheme?

- A morpheme is the smallest meaningful unit in a language.

Types of Morphemes

Free Morphemes

Can stand alone.

Examples

Book

Car

Happy

Play

Bound Morphemes

Cannot stand alone.

Examples

un-

-ed

-ing

-s

-er

Word Formation Process

How Words are Formed

- Root word $\longrightarrow$ Prefix+ Root word +Suffix $\longrightarrow$ New Word

Examples

Root	Prefix	Suffix	New Word
Happy	Un	Ness	Unhappiness
Teach	—	Er	Teacher
Nation	Inter	Al	International
Read	Re	—	Reread

Types of Morphology

- **Inflectional Morphology**

- Changes grammatical form.
- Meaning remains the same.
- Examples
 - Play → Played
 - Cat → Cats
 - Tall → Taller

- **Derivational Morphology**

- Creates a new word.
- Meaning may change.
- Examples
 - Happy → Happiness
 - Teach → Teacher
 - Kind → Unkind

Morphological Analysis in NLP

Morphological analysis breaks words into meaningful parts.

Word

Tokenization

Morpheme Identification

Root Extraction

Word Analysis

Importance of Morphology in NLP

Why Morphology is Important

- Improves machine translation.
- Supports spell checking.
- Enhances grammar checking.
- Helps information retrieval.
- Improves search engines.
- Supports speech recognition.
- Enables text summarization.
- Assists sentiment analysis.
- Helps chatbots understand user input.

Conclusion

- Morphology studies the internal structure of words.
- Morphemes are the basic building blocks of language.
- Word formation involves prefixes, suffixes, and root words.
- Morphological analysis improves language understanding.
- It plays a vital role in modern NLP applications.
- Morphology enhances the performance of AI-based language systems.

DFA Transition Table

States	0	1
$\rightarrow q_0$	$\{q_1, q_2\}$	ϕ
$\{q_1, q_2\}$	ϕ	$\{q_0, q_2\}$
$\{q_1, q_2\}$	q_0	$\{q_1, q_2\}$

A Transition Table

	0	1
q_0	$\{q_1, q_2\}$	ϕ
q_1	ϕ	$\{q_1, q_2\}$
q_2	q_0	ϕ

Morphemes

What is a Morpheme?

- A morpheme is the smallest meaningful unit in a language.

Types of Morphemes

Free Morphemes

- Can stand alone
- Examples
- Book
- Car
- Happy
- Play
